

# CAR RENTAL SYSTEM

16.04.21

## About the Project

The goal was to develop a car rental system that would be ideal for managing a car rental company.

## Using the program

The user will need to enter all performed actions during the day. At the end of the day, user need to go to the next day for calculate statistics.

## Statistics

After each completed day, the system will notify about the income and statistics of the company. And will also issue recommendations.
